2021-present
Masinde Muliro University of Science and Technology
Diploma Information Technology
2010-2013
Ramba Secondary School
C+

WORK EXPERIENCE
in my git hub repositories I have built cool projects some of witch include a blog build in mern technologies,food recipe application with a recipe api for its backend, a portfolio built in (html,css and react) I am also trying to learn devops and enjoy experimenting with amazons EC2 and S3 services with a passion of branching in the field in the near future doing this projects has provided me with invaluable skills in
- writing and Testing javascript(React) code
- writing APIs using express framework.
- Deploying fully tested code to Heroku
- Using git and github
- Reviewing and Testing code
writing and testing front end code in HTML and CSS

HISTORY
I was previously a cameraman and lighting operator working at citizen TV a local news station in Kenya I had studied production journalism at Kenya Institute Mass Communication and worked on the said roles for 2years before being introduce to software development by a friend in 2019 since then I never looked back and my passion for coding just grew everyday I resigned from my job in 2020 to per sue a course in Information Technology
